**Lodge Meeting Room of the Drummond Island Resort and Conference Center**  
**9 am – 3 pm**

- Introductions / Meeting Logistics -
  
- Final Report to the Legislature - Jim Nicholas  
Comments on Draft
  
- Determination of ARI (Adverse Resource Impact)
  
- Watershed User Groups
  
- Mitigation
  
- Guiding Principle #20  
"The quality of our water is threatened by the discharge of toxic, carcinogenic and endocrine disrupting compounds which are used in our homes and businesses. Examples of these compounds are pharmaceuticals, herbicides, pesticides and personal health care products. Better treatment of our point and non-point water discharges is essential to prevent harm to the aquatic organisms and humans who depend on a continuous supply of high quality water."
  
- Wrap Up
